

Factorize Perks

what I need from you

Complete · tested standalone and inside the hub (Sept 5, 2026)

What it does for you

Membership perks: a paid-member flag, a member discount (5%), a shipping credit (free shipping up to \$10), and the 'get exclusive offers' pitch on product pages.

What I need from you

Everything below is something only the store owner can supply or decide — the code side is finished and waiting for these values.

1. Membership price and how it is sold

Right now the paid flag is set on the user; a real program needs a purchasable membership.

Tell me the price and term (e.g. \$29/year) and I create the Membership product that flips the flag on purchase — or say you will set flags by hand in Users.

2. Final discount % and shipping credit

Currently 5% and \$10.

```
wp option update factorize-perks_options '{"discount_pct":5,"shipping_credit":10}' --format=json
```

3. The 'exclusive offers' promise

The pitch promises offers; something has to deliver them.

Email list (Mailchimp/Brevo account + list ID) or SMS (Twilio) — or reword the pitch to what you will actually send.

4. Points tiers

The Points & Rewards order-total tiers are enabled with placeholder values.

Points per \$ and redemption value.

Optional / later

- Member-only early access to new arrivals.
- Birthday coupon.

How you will know it is working

- Log in as member@example.com / DemoMember1! on the demo: discount line and free-shipping credit appear at checkout; a guest sees the pitch instead.
